

Job Title: EIT

Want to work in a state-of-the-art mining facility?

Who We Are:

Welcome to Vale in Canada. As a leader in the mining industry, our responsibility is to positively impact our people, communities and the environment. We value our workforce and offer continuous training and career development opportunities for our people.

Vale is a global leader in the production of iron ore and one of the largest producers of nickel. Active in Canada for over 100 years, Vale employs nearly 6,000 people across our corporate office in Toronto and sites in Manitoba, Ontario, Newfoundland and Labrador. Applying the latest technologies to sustainably produce nickel, copper, cobalt, platinum group metals, gold and silver is at the heart of what we do.

With our global headquarters in Rio de Janeiro, Brazil, and approximately 125,000 employees in over 30 countries, Vale is constantly growing and changing. We invite you to be part of our evolution.

Our Team:

The Opportunity:

We are seeking EITs to join our department. The successful candidate will be a member of Vale Central Engineering Department in Sudbury, Ontario. The candidate will be responsible to provide design engineering services to Vale's various plants and mines.

The position requires the person to participate in producing innovative engineering design solutions to operating and maintenance problems. In addition, the person will participate in preparing project scopes of work and associated work packages for construction.

The position involves regular trips to underground mines and to the various surface plants. The candidate must possess valid driver license.

As an EIT, you will;

- Be part of a team of design personnel to complete engineering designs.
- Ensure adherence to scope, schedule, budget, codes and standards.
- Participate in designs produced under the technical direction of a P. Eng.
- Participate in engineering studies, field inspections, and prepare relevant reports.
- Participate in the review of construction and commissioning and start-up functions.
- Apply sound engineering knowledge
- Become familiar with codes, acts and regulations

- Follow Vale's Safety Policies, Programs and Legislative Standards
- Develop skills and abilities related to the provision of engineering in Ontario
- Ensure compliance to the applicable laws, standards and guidelines
- Provide technical support to enable safe and efficient operations in an industrial plant, mine or production laboratory.

- Maintain demonstrate open and clear dialogue in all aspects of work

About You

Education:

- Currently enrolled and in good standing in an Engineering or Science University Co-op program in any of the following fields:
 - Chemical
 - Electrical
 - Mechanical
 - Metallurgical
 - Materials
 - Mining
 - Environmental

Skills

- Demonstrate good written and oral communication skills
- Proficiency in Microsoft Office 365 products; Teams, Word, Excel, Outlook

Difference Makes All the Difference

At Vale, we are committed to ensuring an inclusive work environment where people feel comfortable to be themselves. Vale encourages everyone to express their ideas and opinions and values the plurality of individual profiles. We want our people to feel that all voices are heard, all cultures respected and that a variety of perspectives are not only welcome – they are essential to our success. We treat each other fairly and with dignity regardless of race, gender, nationality, ethnic origin, religion, age, sexual orientation or any other personal consideration that makes us different.

Vale is an equal opportunity employer seeking to increase diversity across our operations and improve equal opportunity at Vale and in the mining industry.
