

Software Programmer (entry-level, permanent position, full time)

Synaptic Technologies is looking for an entry-level, self-motivated, high-caliber and creative Software Programmer to join our team.

The successful candidate must have graduated with a post-secondary degree or diploma from an accredited university or college within the last 3 years.

Specific experience in one or more of the following is required:

- iOS development (SWIFT / Objective-C / Xcode)
- Android development (Java / Android Studio)
- Unity development (C# / Unity)
- Python development
- OpenCV and QT integration
- Experience working within a variety of operating systems (Linux, MacOS, Windows)

Experience and Skills that are asset to this position:

- Adapt easily to new programming languages and IDEs
- UI Design and implementation
- Software Unit Testing
- Experience with microcontroller firmware (C / C++)
- Familiar with electronic circuits
- Knowledge of Software Lifecycle Management
- Technical document writing

Key Functions:

- Implement software solutions on a variety of platforms
- Define and document software requirements and design entities
- Document and perform Unit Testing of software components
- Conduct Acceptance Tests of software solutions
- Write technical documents and reports for various stages of the software development process
- Communicate with internal and external clients

We look forward to reviewing your application.
